PR 4 — BR04

This is **your BR04** part.

Staff User Management

BR04 developer writes:

Plain text

```
auth/  
├── controller/  
│   └── StaffUserManagementController.java  
├── service/  
│   └── StaffUserService.java  
└── dto/request/  
    ├── StaffCreateRequest.java  
    └── StaffUpdateRequest.java
```

If your demo project uses the admin naming from the patch, then use the corresponding exact demo names:

Plain text

```
StaffUserAdminController / StaffUserManagen  
StaffUserAdminService / StaffUserService  
StaffUserAdminRepository  
StaffUserResponse  
StaffUserConflictException  
S
```

Ask ChatGPT

Do not change the naming halfway through.

Don't change the naming halfv

Keep whatever naming your actual demo project already uses.

Dashboard

Plain text

```
dashboard/  
├── controller/  
│   └── DashboardController.java  
├── service/  
│   └── DashboardService.java  
├── repository/  
│   └── DashboardRepository.java  
└── dto/  
    └── DashboardMetricsResponse.java
```

BR04 owns the dashboard and new staff-management implementation.

InsureWise_BR_Single_Owner_File_Assignment.docx

BR04 can also contain

The BR04 developer needs the **same BR1 classes** to make the project compile:

Plain text

StaffUser.java

StaffUserRepository.java

Ask ChatGPT

12:27

56

DashboardController.java

service/

DashboardService.java

repository/

DashboardRepository.java

dto/

DashboardMetricsResponse.java

BR04 owns the dashboard and new staff-management implementation.

InsureWise_BR_Single_Owner_File_Assignment.docx

BR04 can also contain

The BR04 developer needs the **same BR1 classes** to make the project compile:

Plain text

StaffUser.java
StaffUserRepository.java
SecurityConfig.java
JwtService.java
...

That's okay if the code is exactly the same as BR1's version.

PR 5 — BR05

BF + Ask ChatGPT

Category management

That's okay if the code is exactly the same as

version.

PR 5 — BR05

BR05 developer writes

Category management

Plain text

```
policy/
├── controller/
│   └── CategoryController.java
├── service/
│   └── CategoryService.java
├── repository/
│   └── CategoryRepository.java
├── entity/
│   ├── Category.java
│   └── CategoryStatus.java
└── dto/
    ├── request/
    │   ├── CategoryCreateRequest.java
    │   └── CategoryUpdateRequest.java
    └── response/
        └── CategoryResponse.java
```

These are BR5-specific classes.

InsureWise_BR_Single_Owner_File_Assignment.docx

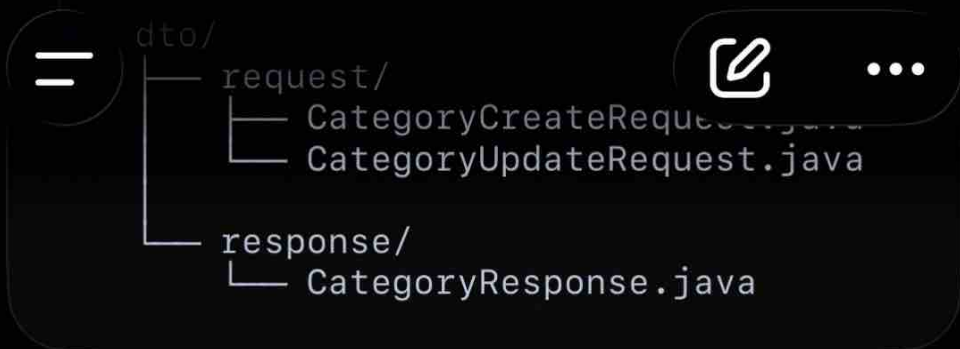

BR05 also needs the policy classes

Be

Ask ChatGPT

These are BR5-specific classes.

InsureWise_BR_Single_Owner_File_Assignment.docx

BR05 also needs the policy classes

Because BR5 manages policies too:

Plain text

```

PolicyController.java
PolicyService.java
PolicyRepository.java
Policy.java
PolicyStatus.java
PolicyResponse.java
PolicyCreateRequest.java
PolicyUpdateRequest.java
  
```

Since your base is empty, the BR5 developer can have the **same BR2 policy classes** in their branch.

But the code must be identical to BR2's version.

This is the same as the BR2 version.

Ask ChatGPT

the code must be identical to

BR2's version.

This is the important distinction.

PR 6 — BR06

BR06 is the one where we have to be careful.

BR06-specific classes

BR06 writes the **decision/approval functionality**.

For example:

Plain text

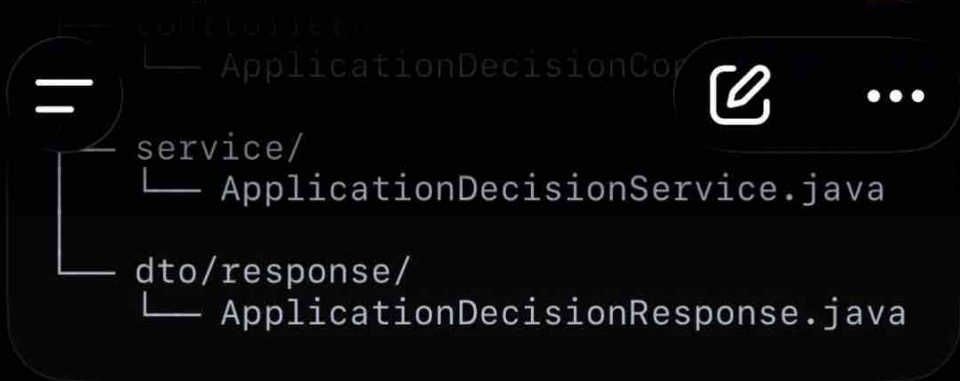

```
policy/
├── controller/
│   └── ApplicationDecisionController.java
├── service/
│   └── ApplicationDecisionService.java
└── dto/response/
    └── ApplicationDecisionResponse.java
```

And the equivalent class for decision functionality if your demo project has a separate class for it.

Ask ChatGPT

And the equivalent claim decision functionality if your demo project has a separate class for it.

BR06 also needs

Plain text

```

PolicyApplication.java
ApplicationStatus.java
PolicyApplicationRepository.java
  
```

```

Claim.java
ClaimStatus.java
ClaimRepository.java
  
```

```

Payment.java
PaymentStatus.java
PaymentRepository.java
  
```

These can be the **same code** as BR2/BR3.

The ownership model is that BR6 owns the decision functionality, while BR2 remains the owner of application classes and BR3 remains the owner of claim/payment classes.
